STANDARD & POOR'S CORPORATION

HOW TO USE STANDARD & POOR'S BOND GUIDE

It is necessary to read carefully the following instructions in order to obtain the correct interpretation of the various abbreviations and data in the Guide.

INDEX

The index numbers are a visual guide to the columnar data.

Exchange

Indicates: ● traded New York Stock Exchange, ◆ American Stock Exchange.

BONDS
Name and Description of Issue
Description, Interest Rate, Due and Interest Date

This column gives the name of the issue. In many instances, because of their length, names are abbreviated, as, for example, Pr. – Power, Lt. – Light, Ry. – Railway, etc. Also see standard abbreviations used on Page 7. Every effort has been made, within space limitations, to show the exact corporate title of the issuing company.

This column describes the issue, giving the interest rate and due date. Abbreviations are widely used, as, for example, Deb–Debenture, Cts.–Certificates, Ext–External, etc. A complete list of abbreviations used in the Earnings and Ratings Bond Guide will be found on Page 7.

Interest dates are indicated by the first letter of the alternate six months on which coupons are payable. Unless otherwise noted, such interest dates are always the first day of the month. The month of maturity is indicated by a capital letter.

S&P Quality Rating

A complete explanation of Standard & Poor's Bond Quality Ratings is presented on Page 5.

Eligibility

See explanation on Page 4, and Bank Investment Regulations on Page 6.

Tax Status
Legality

Please refer to detailed explanation on Page 4 as to Tax Status.
Please refer to Page 4 for details of Legality features and symbols.

Original Offering Price & Date

This is the price and date at which the issue was originally offered. When necessary, prices are shown to the nearest eighth.

CALL PRICE
For S.F. | **Regular**

This space shows the call price for sinking fund, if any, as well as the regular call price. Unless otherwise indicated, bonds are callable at any time. The symbol † means that the call price shown cannot be used without qualification, in that the price shown will decline within the next twelve months. See also page 4 for other symbols and explanation.

PRICE RANGE
1936-56 High Low | **1957 High Low** | **1958 High Low** | **1959 High Low**

High and Low price ranges are for the calendar years indicated.

Price ranges are not necessarily exclusive for the exchange, if any, on which the bond is currently traded, but are based on the best available data covering the period of the column head.

Ranges may not necessarily cover the entire period of the column head. For example, under 1936-56, for bonds issued subsequent to 1936, the range would be from the time of issuance through the year 1956.

The price range of "Over-the-Counter" bonds is based on the best available information as to the high and low "Bid" prices during the period. Because of the lack of reliable data, some of these "Over-the-Counter" ranges may be subject to a fair margin of error. Generally, unlisted bond ranges should best be viewed as reasonable approximations.

Cum. 1959 Sales (000)

Shown only for listed bonds, this figure represents the total of sales (in 000) for the year through the end of the preceding month.

Last Sale or Bid Ask

Last sale or quotations are as of the last day of the preceding month. Canadian prices are shown by ▲.

Yield to Mty. | **Com. Yield**

Yields are computed on the last or on the "Ask" price, except where there is only a "Bid" for the issue. Serial maturities are figured on a current yield basis. "Def" indicates the bond is in default of its interest, since the date shown. "Flat" means that the bond is traded on a "without accrued interest" basis.

Subscription rate $24.00 per year. Second class postage paid at New York, N. Y.

BOND GUIDE

Published

JULY • 1959

ard & Poor's Bond Guide is designed to present in a convenient, manner the most pertinent comparative financial and statistical informa- a broad list of corporate bonds. Thus, it is an ideal medium for formu- quick opinion as to the relative investment merits of the numerous sues covered, and for following the trend of their market prices and In addition, Standard & Poor's Bond Quality Ratings are presented for nds.

names of the companies whose issues are covered in the Bond Guide anged alphabetically, thus providing the utmost ease of reference. n is especially called to the "era treatment" of price information and nding data of lowest fixed charge coverage for the periods 1929-35 and . This is a unique new departure in financial-statistical presentation, designed expressly to show in an economy of space the most important tion from the viewpoint of sound bond analyses.

Numerous pages of the Bond Guide are also devoted to significant supplementary information, including recent changes in S & P Bond Quality Ratings, changes in Bank Status, long term records of bond yields, graphic yield charts, etc. In addition, a special section in each issue of the Bond Guide is devoted to bonds called for redemption and new bond issues registered with the SEC.

United States Government bonds are presented in still another special section of the book.

Although the Bond Guide is not itself an analytical publication, it represents, nevertheless, the results of intensive and extensive analysis by bond specialists utilizing the facilities of the largest and oldest financial advisory and statistical organization in the world. The Bond Quality Ratings in particular are the end result of wide analytical research and special investigation. The factual data presented have been obtained from official company reports and reports to the SEC.

ATTRACTIVE BONDS

The bonds listed on this and the following page are selections from current recommendations in Standard & Poor's bond advisory publications. These publications include STANDARD & POOR'S BOND INVESTMENTS, which include a weekly "Bond Outlook" discussing and analyzing the bond market in relation to the economic and monetary prospect, and the well-known S & P "Bond Selectors"; and STANDARD BOND REPORTS, a bond advisory service consisting of individual loose-leaf analytical reports and forecasts on bonds in which there is representative investor's interest. It is earnestly advised that, before making purchases of any of the bonds in the following lists, subscribers consult first, whenever possible, the detailed recommendation contained on the individual report, and that such purchases only be made if in accordance with existing recommendations as to general bond market policy and portfolio requirements.

Bonds are listed according to maturity, utility issues first, followed by industrial and railroad bonds.

HOW TO USE THE S & P EARNINGS AND RATINGS BOND GUIDE

The following explanations are in addition to those given in the pilot pages shown on the inside front and inside rear covers.

ELIGIBILITY

Under regulations issued by the Comptroller of the Currency, as shown on Page 6, only certain bond issues are eligible for bank investment. The standing under these regulations of the various bond issues covered by the Bond Guide is indicated under the "Eligibility" column, by the following symbols:

X—This symbol designates bonds rated the equivalent of Standard & Poor's A1+, A1, A or B1+ ratings by a majority of the three recognized rating agencies which have assigned ratings to the issue.

sX—These are "special privilege" bonds. They include "convertible" and "with warrants" issues. In the opinion of Standard & Poor's they may be considered "eligible" provided the speculative value of their "special privilege" is not reflected in their current market price.

Y—These are bonds which do not conform with the above rating classification. It is the S & P opinion that bonds carrying the (Y) symbol are those which may be valued at the average market price for 18 months just preceding examination.

Z—This symbol indicates bonds with a default status.

Q—These are foreign bonds whose bank eligibility is not determined by the ratings of the various agencies.

TAX STATUS

The numerals in this column of the Bond Guide indicate the Federal Income Taxes paid at the source: 1—1% paid by the company, 2—2% paid by the company, O—no tax paid by the company, "R"—indicates tax paid by the holder of the bond (up to 2%) is refunded by the company.

Subscribers requiring comprehensive information on the tax status of bonds are referred to Standard & Poor's "Status of Bonds" and monthly supplements, which cover the exact tax status under both the Federal and State taxes and serves as a coupon directory.

LEGALITY

Symbols in this column of the Bond Guide indicate representative states in which the various issues covered qualify as legal investments. For all states bonds legal for savings banks also are believed suitable for trust funds. In New Jersey all bonds legal for savings banks are legal for trust funds, but numerous other issues also meet the requirements of the more liberal trust fund law, and are so additionally indicated.

CALL PRICES

As indicated by the column heads, the Earnings and Ratings Bond Guide presents both the regular call price of the bonds covered and the call price for sinking fund, if any.

Unless otherwise indicated, the issues are callable at any time. When a bond is callable only on an interest date, it is so shown by the use of the symbol (*). The symbol (†) means that the call price as given will decline sometime within the next twelve months in accordance with the indenture provisions of the bond. Thus, the call prices so shown must not be used without qualifications. The symbol (‡) means that not only can the bond be called only on an interest date, but also that the call price will decline within the next twelve months.

Non-callable bonds are so indicated by the abbreviation NC. Special abbreviations are also necessary when a bond is not now callable but will be callable at a later date, in which case, for example, the use of 2'63 would mean non-callable now but callable at 102 in 1963. The use, as another example of special call features, of ½-3 would indicate the range of call prices on serial maturity bonds, the first figure (100½) being the present call price for the first maturity and the last figure (103) being the call price for the last maturity.

STANDARD & POOR'S BOND RATINGS

In the Standard & Poor's bond quality ratings system, interest-paying bonds are graded into eight classifications ranging from A1+ for the highest quality designation through A1, A, B1+, B1, B, C1+ to C1 for the lowest. Bonds on which no interest is being paid, either because of default or because of "income" characteristics, are given C, D1 and D ratings. United States Government bonds are not rated, but are considered as a yardstick against which to measure all other issues.

BANK QUALITY BONDS

Under present commercial bank regulations, bonds assigned quality ratings equivalent to A1+, A1, A and B1+ generally are regarded as eligible for bank investment.

A1+ Bonds rated A1+ are the highest grade corporate obligations. They possess the ultimate degree of protection as to principal and interest. Marketwise, they may be expected to move with interest rates and hence are desirable investment media for institutions and individuals seeking maximum safety.

A1 Bonds rated A1 also qualify as high grade obligations, and in the majority of instances differ from A1+ issues only moderately in the various elements of safety. A1-rated bonds, too, move with interest rates and hence are appropriate media where safety is a prerequisite.

A Bonds rated A are regarded as upper medium grade. They have considerable investment strength but are not wholly free from possible adverse effects of changes in economic conditions. However, interest is regarded as secure and, by and large, principle appears relatively safe. They predominantly reflect money rates in their market behavior, and, to some extent also, business conditions.

B1+ The B1+, or medium grade, category is borderline between definitely sound obligations and those wherein the speculative element begins to predominate. These bonds have adequate asset protection and normally are covered by satisfactory earnings. Their susceptibility to changing conditions, particularly to lengthy depressions, necessitates constant watching. Marketwise, the bonds are as responsive to business conditions as they are to interest rates. The group is the lowest which qualifies for commercial bank investment.

SUB-STANDARD BONDS

As we move down the quality rating scale, beginning with B1, investment characteristics weaken and the speculative elements become progressively stronger. Bonds in this group do not qualify for investment by commercial banks.

B1 Bonds given a B1 rating are regarded as lower medium grade. They have some investment characteristics, though not enough to warrant an investment rating. In the case of utilities, interest is earned consistently but by narrow margins. In the case of other type of obligors, charges are earned on average by a fair margin, but in poor periods deficit operations are likely. These bonds fluctuate widely with business conditions.

B Bonds rated as low as B are speculative. Payment of principal and interest cannot be assured, though frequently bonds in this group continue paying interest even though it is earned only on a cash basis. The issues move primarily with the equity market.

C1+-C1 Bonds rated C1+ and C1 are outright speculations, with the lower rating denoting the more speculative. Interest is paid, although in the case of C1 ratings the bonds may be on an income basis and the payment may be small.

C This rating is reserved for income bonds on which no interest is being paid, and for the best defaulted issues.

D1-D All bonds rated D1 and D are in default, with the D symbol assigned to issues which appear to have little recoverable value.

CANADIAN BONDS

Canadian corporate bonds are rated on the same basis as American corporate issues. The ratings measure the intrinsic value of the bonds, but they do not take into account exchange and other uncertainties.

FOREIGN BONDS

Foreign bonds carry the same rating symbols as domestic bonds, but in all cases they are preceded by a star ★ to denote a conditional rating. This is applied because the obligor is a sovereign body and the bonds are sometimes affected by other than economic factors.

BANK INVESTMENT SECURITIES REGULATION

Effective Aug. 16, 1957, the Comptroller of the Currency issued following regulation applying to the purchase for its own account of investment securities by a national bank or a State member bank of the Federal Reserve System.

Definition of the Term "Investment Securities"

(a) An obligation of indebtedness which may be purchased for its own account by a national bank or State member bank of the Federal Reserve System in order to constitute an "investment security" within the meaning of paragraph Seventh of section 5136 of the Revised Statutes, must be a marketable obligation, i.e., it must be salable under ordinary circumstances with reasonable promptness at a fair value; and except as provided in (b) and (c) below, there must be present one or both of the following characteristics:

(1) A public distribution of the securities must have been provided for or made in a manner to protect or insure the marketability of the issue; or,

(2) Other existing securities of the obligor must have such a public distribution as to protect or insure the marketability of the issue under consideration.

(b) In the case of investment securities for which a public distribution as set forth in (1) or (2) above cannot be so provided, or so made, and which are issued by established commercial or industrial businesses or enterprises, that can demonstrate the ability to service such securities, the debt evidenced thereby must mature not later than ten years after the date of issuance of the security and must be of such sound value or so secured as reasonably to assure its payment; and such securities must, by their terms, provide for the amortization of the debt evidenced thereby so that at least 75% of the principal will be extinguished by the maturity date by substantial periodic payments: Provided, that no amortization need be required for the period of the first year after the date of issuance of such securities.

(c) Special revenue obligations of States or local governments or of duly constituted public Authorities thereof which possess a high degree of credit soundness, so as to assure sale under ordinary circumstances with reasonable promptness at a fair value, but which do not meet the distribution standards of (a) (1) or (a) (2) above, may be considered to constitute "investment securities."

(d) Where the security is issued under a trust agreement, the agreement must provide for a trustee independent of the obligor, and such trustee must be a bank or trust company.

(e) All purchases of investment securities by national and State member banks for their own account must be securities "in the form of bonds, notes, and/or debentures, commonly known as investment securities"; and every transaction which is in fact such a purchase must, regardless of its form, comply with this regulation.

Limitations and Restrictions on Purchase of Investment Securities For Bank's Own Account

(a) Although the bank is permitted to purchase "investment securities" for its own account for purposes of investment under the provisions of R. S. 5136 and this regulation, the bank is not permitted otherwise to participate as a principal in the marketing of securities.

(b) The statutory limitation on the amount of the "investment securities" of any one obligor or maker which may be held by the bank is to be determined on the basis of the par or face value of the securities, and not on their market value.

(c) The purchase of "investment securities" in which the investment characteristics are distinctly or predominantly speculative, or the purchase of securities which are in default, whether as to principal or interest, is prohibited.

(d) Purchase of an investment security at a price exceeding par or face value is prohibited, unless the bank shall:

(1) Provide for the regular amortization of the premium paid so that the premium shall be entirely extinguished at or before the maturity of the security, and the security (including premium) shall at no intervening date be carried at an amount in excess of that at which the obligor may legally redeem such security, unless the amortization which would be necessary to meet the latter requirement would not be allowable as a deduction from gross income under applicable Federal Internal Revenue laws and regulations issued thereunder, in which case the rate of amortization shall be sufficient to extinguish the premium by maturity; or

(2) Set up a reserve account to amortize the premium, said account to be credited periodically with an amount not less than the amount required for amortization under (1) above.

(e) Purchase of securities convertible into stock at the option of the issuer is prohibited

(f) Purchase of securities convertible into stock at the option of the holder or with stock purchase warrants attached is prohibited if the price paid for such security is in excess of the investment value of the security itself, considered independently of the stock purchase warrants or conversion feature. If it is apparent that the price paid for an otherwise eligible security reflects the investment value of the security and does not include any speculative value based upon the presence of a stock purchase warrant or conversion option, the purchase of such security is not prohibited. If the price paid for a convertible security provides a yield reasonably similar to that of non-convertible securities of similar quality and maturity, a speculative value will not be deemed to exist.

(g) All investment securities shall be supported by adequate information in the files of the bank as to their investment quality.

AX STATUS (A) Exempt from Federal normal tax, and on holdings not exceeding in the aggregate $5,000 principal amount, from Federal surtaxes. (B) Wholly exempt from Federal income taxes. (D) Fully taxable under Federal tax acts.

OTE: All obligations of the United States and its instrumentalities are exempt from all taxation imposed by any state or by any local taxing authority. They are subject to estate, inheritance, gift, or other excise taxes whether Federal or state.

CALLED BONDS SECTION

This section lists alphabetically bonds covered in the Guide which have been called for redemption in whole or in part, indicating amount called, the call price, date of redemption, and where payment is made. The notice of the call is carried in this section until redemption date is reached. Numbers of bonds called of partial redemptions may be checked with list on file at our Chicago office.

Obviously, it is not practicable to publish within the narrow confines of this publication a comprehensive called bond service as is presented in Standard & Poor's "Called Bond Record." Users of the Bond Guide requiring extensive called bond coverage, inclu a complete record of tenders asked and proposals, information on bonds in default, comprehensive bond interest payments, and redem data on equities, are referred to that publication.

Issue	Amount Called	Date Called	Call Price	Paying Agent
July, 1959

HOW TO USE STANDARD & POOR'S BOND GUIDE

necessary to read carefully the following instructions in order to obtain the current interpretation of the various abbreviations and data in the Guide.

GENERAL INFORMATION
rest Payments, Bonds Called, Etc.

In this column is given information of a general character which may be necessary to round out the material presented in the other columns. Here will be found such information as latest income bond interest payments, name of the assuming company, if any; guarantors, information on bond committees, status in possible reorganization, etc. Similar additional information occasionally will be presented in other columns when necessary.

Underwriter and MARKET

This column shows, by keys to the Directory of Dealers in the rear of the book, the original underwriter of the issue, shown in italics, and the present interested over-the-counter dealers. Issues traded on national security exchanges are so indicated by abbreviations (Page 7) of those exchanges.

OUTSTANDING
Amt.—Mil.-$—Total

This Issue | Prior Liens | Fund. Debt.

This is the amount of the issue outstanding in millions of dollars, as of the balance sheet date shown under Financial Position, unless otherwise noted, except for Railroads which is as of the fiscal year end.

This column shows the amount of obligations which, in the opinion of Standard & Poor's, rank prior to the issue under consideration.

Total funded debt of the company or system, including Purchase Money Obligations, Equipments, Real Estate Mortgages, etc.

FINANCIAL POSITION
—Mil.-$— | Balance Sheet Date

Cash & Equivalent | Curr. Assets | Curr. Liabs.

Cash & Equivalent, Current Assets and Current Liabilities are given in millions of dollars (000,000 omitted), as 17.5—$17,500,000; 1.75—$1,750,000; 0.18—$175,000, etc. All information in this column is brought up to date upon the release of interim statements. The date of the balance sheet from which the information shown was obtained is also given.

Where current balance sheet items are not of analytical significance, special calculations pertinent to the industry in which the company operates are presented, as "Net Asset Value Per $1,000 Bond" for Investment Trusts, etc.

Yr.-End.

This is the month of the year in which the company's fiscal year closes.

ANNUAL EARNINGS
Times Int. & Misc. Charges Earned

1929-35 Low | 1936-55 Low | 1956 | 1957 | 1958

The number of times that available earnings cover interest and miscellaneous charges making up what is generally known as "fixed charges," is shown in these columns for the periods of the column heads. For the years 1929 through 1935 and 1936 through 1955 only the figure representing the worst year of the period is given, as a guide to the adequacy of such coverage under adverse cyclical conditions. Coverage figures for fiscal years ending March 31 or earlier are shown under the column of the preceding calendar year.

Earnings available for income bond interest payments are shown as a percent of par value of the issue outstanding. Fixed charges include not only interest on funded debt, but also interest on bank loans and other forms of floating debt, amortization charges, discounts on securities sold, and any other similar charges. Earnings available for fixed charges are calculated by Standard & Poor's and shown in the Bond Guide after allowance for income taxes, but before extraordinary charges or appropriations to special reserves.

In many instances where important reorganizations have taken place in recent years, the coverage figures are given for previous years on the basis of earnings in these years but on the charges after reorganization. Such cases are correspondingly footnoted.

Interim coverage figures, etc., are shown, when and where available, for the longest accounting interval since the last fiscal year-end.

INTERIM EARNINGS
Times Earned

Period | 1958 | 1959

Why You Should Use—

Standard & Poor's Industry Surveys

They give continuously revised analyses (current and basic) of leading industries. Give outlook for companies' common and preferred stocks. Forty-five surveys cover some 1,000 companies and give definite opinions on over 1,500 issues of common and preferred stocks.

Trends and Projections (monthly) Bulletin part of this Industry Surveys Service forecasts general industry trends.

This unique Bulletin forecasts up to a year ahead the sales, inventories, unfilled orders, and new orders in America's 45 chief industries! It will help you invest for future profit by answering such questions as, Where is Business Heading, What is the Direction of Prices, Defense Spending, Consumer Spending and Income . . . advance material so vital to you as an investor.

HOW TO USE STANDARD & POOR'S BOND GUIDE

It is necessary to read carefully the following instructions in order to obtain the correct interpretation of the various abbreviations and data in the Guide.

The index numbers are a visual guide to the columnar data.

INDEX

Exchange

Indicates: ● traded New York Stock Exchange ◆ American Stock Exchange.

BONDS
Name and Description of Issue
Description, Interest Rate, Due and Interest Date

This column gives the name of the issue. In many instances, because of their length, names are abbreviated, as for example, Pr. — Power, Lt. — Light, Ry.—Railway, etc. Also see standard abbreviations used on Page 7. Every effort has been made, within space limitations, to show the exact corporate title of the issuing company.

This column describes the issue, giving the interest rate and due date. Abbreviations are widely used, as, for example, Deb—Debenture, Cts—Certificates, Ext—External, etc. A complete list of abbreviations used in the Earnings and Ratings Bond Guide will be found on Page 7.

Interest dates are indicated by the first letter of the alternate six months on which coupons are payable. Unless otherwise noted, such interest dates are always the first day of the month. The month of maturity is indicated by a capital letter.

S&P Quality Rating

A complete explanation of Standard & Poor's Bond Quality Ratings is presented on Page 5.

Eligibility

Tax Status

Legality

See explanation on Page 4, and Bank Investment Regulations on Page 6.

Please refer to detailed explanation on Page 4 as to Tax Status.

Please refer to Page 4 for details of Legality features and symbols.

Original Offering Price & Date

This is the price and date at which the issue was originally offered. When necessary, prices are shown to the nearest eighth.

CALL PRICE
For S.F. — Regular

This space shows the call price for sinking fund, if any, as well as the regular call price. Unless otherwise indicated, bonds are callable at any time. The symbol † means that the call price shown cannot be used without qualification, in that the price shown will decline within the next twelve months. See also page 4 for other symbols and explanation.

PRICE RANGE
1936-56 High Low — 1957 High Low — 1958 High Low — 1959 High Low

High and Low price ranges are for the calendar years indicated.

Price ranges are not necessarily exclusive for the exchange, if any, on which the bond is currently traded, but are based on the best available data covering the period of the column head.

Ranges may not necessarily cover the entire period of the column head. For example, under 1936-56, for bonds issued subsequent to 1936, the range would be from the time of issuance through the year 1956.

The price range of "Over-the-Counter" bonds is based on the best available information as to the high and low "Bid" prices during the period. Because of the lack of reliable data, some of these "Over-the-Counter" ranges may be subject to a fair margin of error. Generally, unlisted bond ranges should best be viewed as reasonable approximations.

Cum. 1959 Sales (000)

Shown only for listed bonds, this figure represents the total of sales (in 000) for the year through the end of the preceding month.

Last Sale or Bid Ask

Last sale or quotations are as of the last day of the preceding month. Canadian prices are shown by ▲.

Yield to Mty.

Yields are computed on the last or on the "Ask" price, except where there is only a "Bid" for the issue. Serial maturities are figured on a current yield basis. "Def" indicates the bond is in default of its

BOND GUIDE

Published

AUGUST • 1959

& Poor's Bond Guide is designed to present in a convenient, anner the most pertinent comparative financial and statistical informa- broad list of corporate bonds. Thus, it is an ideal medium for formu- uick opinion as to the relative investment merits of the numerous s covered, and for following the trend of their market prices and addition, Standard & Poor's Bond Quality Ratings are presented for s.

nes of the companies whose issues are covered in the Bond Guide ged alphabetically, thus providing the utmost ease of reference. is especially called to the "era treatment" of price information and ing data of lowest fixed charge coverage for the periods 1929-35 and This is a unique new departure in financial-statistical presentation, igned expressly to show in an economy of space the most important n from the viewpoint of sound bond analyses.

Numerous pages of the Bond Guide are also devoted to significant supplementary information, including recent changes in S & P Bond Quality Ratings, changes in Bank Status, long term records of bond yields, graphic yield charts, etc. In addition, a special section in each issue of the Bond Guide is devoted to bonds called for redemption and new bond issues registered with the SEC.

United States Government bonds are presented in still another special section of the book.

Although the Bond Guide is not itself an analytical publication, it represents, nevertheless, the results of intensive and extensive analysis by bond specialists utilizing the facilities of the largest and oldest financial advisory and statistical organization in the world. The Bond Quality Ratings in particular are the end result of wide analytical research and special investigation. The factual data presented have been obtained from official company reports and reports to the SEC.

ATTRACTIVE BONDS

The bonds listed on this and the following page are selections from current recommendations in Standard & Poor's bond advisory publications. These publication include STANDARD & POOR'S BOND INVESTMENTS, which include a weekly "Bond Outlook" discussing and analyzing the bond market in relation to the economi and monetary prospect, and the well-known S & P "Bond Selectors"; and STANDARD BOND REPORTS, a bond advisory service consisting of individual loose-le analytical reports and forecasts on bonds in which there is representative investor's interest. It is earnestly advised that, before making purchases of any of the bond in the following lists, subscribers consult first, whenever possible, the detailed recommendation contained on the individual report, and that such purchases only be mad if in accordance with existing recommendations as to general bond market policy and portfolio requirements.

Bonds are listed according to maturity, utility issues first, followed by industrial and railroad bonds.

HOW TO USE THE S & P EARNINGS AND RATINGS BOND GUIDE

The following explanations are in addition to those given in the pilot pages shown on the inside front and inside rear cove

ELIGIBILITY

Under regulations issued by the Comptroller of the Currency, as shown on Page 6, only certain bond issues are eligible for bank investment. The standing under these regulations of the various bond issues covered by the Bond Guide is indicated under the "Eligibility" column, by the following symbols:

X—This symbol designates bonds rated the equivalent of Standard & Poor's A1+, A1, A or B1+ ratings by a majority of the three recognized rating agencies which have assigned ratings to the issue.

sX—These are "special privilege" bonds. They include "convertible" and "with warrants" issues. In the opinion of Standard & Poor's they may be considered "eligible" provided the speculative value of their "special privilege" is not reflected in their current market price.

Y—These are bonds which do not conform with the above rating classification. It is the S & P opinion that bonds carrying the (Y) symbol are those which may be valued at the average market price for 18 months just preceding examination.

Z—This symbol indicates bonds with a default status.

Q—These are foreign bonds whose bank eligibility is not determined by the ratings of the various agencies.

TAX STATUS

The numerals in this column of the Bond Guide indicate the Federal Income Taxes paid at the source: 1—1% paid by the company, 2—2% paid by the company, O—no tax paid by the company, "R"—indicates tax paid by the holder of the bond (up to 2%) is refunded by the company.

Subscribers requiring comprehensive information on the tax status of bonds are referred to Standard & Poor's "Status of Bonds" and monthly supplements, which cover the exact tax status under both the Federal and State taxes and serves as a coupon directory.

LEGALITY

Symbols in this column of the Bond Guide indicate representative states in which the various issues covered qualify legal investments. For all states bonds legal for savings ban also are believed suitable for trust funds. In New Jersey all bon legal for savings banks are legal for trust funds, but numero other issues also meet the requirements of the more liberal tru fund law, and are so additionally indicated.

CALL PRICES

As indicated by the column heads, the Earnings and Ratin Bond Guide presents both the regular call price of the bon covered and the call price for sinking fund, if any.

Unless otherwise indicated, the issues are callable at any tin When a bond is callable only on an interest date, it is so sho by the use of the symbol (*). The symbol (†) means that t call price as given will decline sometime within the next twel months in accordance with the indenture provisions of the bo Thus, the call prices so shown must not be used without quali cations. The symbol (‡) means that not only can the bond called only on an interest date, but also that the call price w decline within the next twelve months.

Non-callable bonds are so indicated by the abbreviation N Special abbreviations are also necessary when a bond is not n callable but will be callable at a later date, in which case, f example, the use of 2'63 would mean non-callable now but callal at 102 in 1963. The use, as another example of special c features, of ½-3 would indicate the range of call prices on ser maturity bonds, the first figure (100½) being the present c price for the first maturity and the last figure (103) being t call price for the last maturity.

STANDARD & POOR'S BOND RATINGS

In the Standard & Poor's bond quality ratings system, interest-paying bonds are graded into eight classifications ranging from A1+ for the highest quality designation through A1, A, B1+, B1, B, C1+ to C1 for the lowest. Bonds on which no interest is being paid, either because of default or because of "income" characteristics, are given C, D1 and D ratings. United States Government bonds are not rated, but are considered as a yardstick against which to measure all other issues.

BANK QUALITY BONDS

Under present commercial bank regulations, bonds assigned quality ratings equivalent to A1+, A1, A and B1+ generally are regarded as eligible for bank investment.

A1+ Bonds rated A1+ are the highest grade corporate obligations. They possess the ultimate degree of protection as to principal and interest. Marketwise, they may be expected to move with interest rates and hence are desirable investment media for institutions and individuals seeking maximum safety.

A1 Bonds rated A1 also qualify as high grade obligations, and in the majority of instances differ from A1+ issues only moderately in the various elements of safety. A1-rated bonds, too, move with interest rates and hence are appropriate media where safety is a prerequisite.

A Bonds rated A are regarded as upper medium grade. They have considerable investment strength but are not wholly free from possible adverse effects of changes in economic conditions. However, interest is regarded as secure and, by and large, principle appears relatively safe. They predominantly reflect money rates in their market behavior, and, to some extent also, business conditions.

B1+ The B1+, or medium grade, category is borderline between definitely sound obligations and those wherein the speculative element begins to predominate. These bonds have adequate asset protection and normally are covered by satisfactory earnings. Their susceptibility to changing conditions, particularly to lengthy depressions, necessitates constant watching. Marketwise, the bonds are as responsive to business conditions as they are to interest rates. The group is the lowest which qualifies for commercial bank investment.

SUB-STANDARD BONDS

As we move down the quality rating scale, beginning with B1, investment characteristics weaken and the speculative elements become progressively stronger. Bonds in this group do not qualify for investment by commercial banks.

B1 Bonds given a B1 rating are regarded as lower medium grade. They have some investment characteristics, though not enough to warrant an investment rating. In the case of utilities, interest is earned consistently but by narrow margins. In the case of other type of obligors, charges are earned on average by a fair margin, but in poor periods deficit operations are likely. These bonds fluctuate widely with business conditions.

B Bonds rated as low as B are speculative. Payment of principal and interest cannot be assured, though frequently bonds in this group continue paying interest even though it is earned only on a cash basis. The issues move primarily with the equity market.

C1+-C1 Bonds rated C1+ and C1 are outright speculations, with the lower rating denoting the more speculative. Interest is paid, although in the case of C1 ratings the bonds may be on an income basis and the payment may be small.

C This rating is reserved for income bonds on which no interest is being paid, and for the best defaulted issues.

D1-D All bonds rated D1 and D are in default, with the D symbol assigned to issues which appear to have little recoverable value.

CANADIAN BONDS

Canadian corporate bonds are rated on the same basis as American corporate issues. The ratings measure the intrinsic value of the bonds, but they do not take into account exchange and other uncertainties.

FOREIGN BONDS

Foreign bonds carry the same rating symbols as domestic bonds, but in all cases they are preceded by a star ★ to denote a conditional rating. This is applied because the obligor is a sovereign body and the bonds are sometimes affected by other than economic factors.

BANK INVESTMENT SECURITIES REGULATION

Effective Aug. 16, 1957, the Comptroller of the Currency issued following regulation applying to the purchase for its own account of investment securities by a national bank or a State member bank of the Federal Reserve System.

Definition of the Term "Investment Securities"

(a) An obligation of indebtedness which may be purchased for its own account by a national bank or State member bank of the Federal Reserve System in order to constitute an "investment security" within the meaning of paragraph Seventh of section 5136 of the Revised Statutes, must be a marketable obligation, i.e., it must be salable under ordinary circumstances with reasonable promptness at a fair value; and except as provided in (b) and (c) below, there must be present one or both of the following characteristics:

(1) A public distribution of the securities must have been provided for or made in a manner to protect or insure the marketability of the issue; or,

(2) Other existing securities of the obligor must have such a public distribution as to protect or insure the marketability of the issue under consideration.

(b) In the case of investment securities for which a public distribution as set forth in (1) or (2) above cannot be so provided, or so made, and which are issued by established commercial or industrial businesses or enterprises, that can demonstrate the ability to service such securities, the debt evidenced thereby must mature not later than ten years after the date of issuance of the security and must be of such sound value or so secured as reasonably to assure its payment; and such securities must, by their terms, provide for the amortization of the debt evidenced thereby so that at least 75% of the principal will be extinguished by the maturity date by substantial periodic payments: Provided, that no amortization need be required for the period of the first year after the date of issuance of such securities.

(c) Special revenue obligations of States or local governments or of duly constituted public Authorities thereof which possess a high degree of credit soundness, so as to assure sale under ordinary circumstances with reasonable promptness at a fair value, but which do not meet the distribution standards of (a) (1) or (a) (2) above, may be considered to constitute "investment securities."

(d) Where the security is issued under a trust agreement, the agreement must provide for a trustee independent of the obligor, and such trustee must be a bank or trust company.

(e) All purchases of investment securities by national and State member banks for their own account must be securities "in the form of bonds, notes, and/or debentures, commonly known as investment securities"; and every transaction which is in fact such a purchase must, regardless of its form, comply with this regulation.

Limitations and Restrictions on Purchase of Investment Securities For Bank's Own Account

(a) Although the bank is permitted to purchase "investment securities" its own account for purposes of investment under the provisions of R. S. 5 and this regulation, the bank is not permitted otherwise to participate a principal in the marketing of securities.

(b) The statutory limitation on the amount of the "investment securiti of any one obligor or maker which may be held by the bank is to be determi on the basis of the par or face value of the securities, and not on t market value.

(c) The purchase of "investment securities" in which the investment cha teristics are distinctly or predominantly speculative, or the purchase of sec ties which are in default, whether as to principal or interest, is prohibited.

(d) Purchase of an investment security at a price exceeding par or face va is prohibited, unless the bank shall:

(1) Provide for the regular amortization of the premium paid so that premium shall be entirely extinguished at or before the maturity of security, and the security (including premium) shall at no intervening be carried at an amount in excess of that at which the obligor may leg redeem such security, unless the amortization which would be necessary meet the latter requirement would not be allowable as a deduction f gross income under applicable Federal Internal Revenue laws and reg tions issued thereunder, in which case the rate of amortization shall sufficient to extinguish the premium by maturity; or

(2) Set up a reserve account to amortize the premium, said account to credited periodically with an amount not less than the amount required amortization under (1) above.

(e) Purchase of securities convertible into stock at the option of the is is prohibited.

(f) Purchase of securities convertible into stock at the option of the ho or with stock purchase warrants attached is prohibited if the price paid such security is in excess of the investment value of the security it considered independently of the stock purchase warrants or conversion feat If it is apparent that the price paid for an otherwise eligible security ref the investment value of the security and does not include any specula value based upon the presence of a stock purchase warrant or conversion opt the purchase of such security is not prohibited. If the price paid for a vertible security provides a yield reasonably similar to that of non-convert securities of similar quality and maturity, a speculative value will not deemed to exist.

(g) All investment securities shall be supported by adequate information the files of the bank as to their investment quality.

TAX STATUS (A) Exempt from Federal normal tax, and on holdings not exceeding in the aggregate $5,000 principal amount, from Federal surtaxes. (B) Wholly exempt from Federal income taxes. (D) Fully taxable under Federal tax acts.

NOTE: All obligations of the United States and its instrumentalities are exempt from all taxation imposed by any state or by any local taxing authority. They are subject to estate, inheritance, gift, or other excise taxes whether Federal or state.

CALLED BONDS SECTION

This section lists alphabetically bonds covered in the Guide which have been called for redemption in whole or in part, indicating t amount called, the call price, date of redemption, and where payment is made. The notice of the call is carried in this section until t redemption date is reached. Numbers of bonds called of partial redemptions may be checked with list on file at our Chicago office.

Obviously, it is not practicable to publish within the narrow confines of this publication a comprehensive called bond service, su as is presented in Standard & Poor's "Called Bond Record." Users of the Bond Guide requiring extensive called bond coverage, includi a complete record of tenders asked and proposals, information on bonds in default, comprehensive bond interest payments, and redempti data on equities, are referred to that publication.

HOW TO USE STANDARD & POOR'S BOND GUIDE

s necessary to read carefully the following instructions in order to obtain the current interpretation of the various abbreviations and data in the Guide.

GENERAL INFORMATION
terest Payments, Bonds Called, Etc.

In this column is given information of a general character which may be necessary to round out the material presented in the other columns. Here will be found such information as latest income bond interest payments, name of the assuming company, if any; guarantors, information on bond committees, status in possible reorganization, etc. Similar additional information occasionally will be presented in other columns when necessary.

Underwriter and MARKET

This column shows, by keys to the Directory of Dealers in the rear of the book, the original underwriter of the issue, shown in italics, and the present interested over-the-counter dealers. Issues traded on national security exchanges are so indicated by abbreviations (Page 7) of those exchanges.

OUTSTANDING

Amt.—Mil-$—Total			
This Issue	Prior Liens	Fund. Debt.	

This is the amount of the issue outstanding in millions of dollars, as of the balance sheet date shown under Financial Position, unless otherwise noted, except for Railroads which is as of the fiscal year end.

This column shows the amount of obligations which, in the opinion of Standard & Poor's, rank prior to the issue under consideration.

Total funded debt of the company or system, including Purchase Money Obligations, Equipments, Real Estate Mortgages, etc.

FINANCIAL POSITION

Mil-$			Balance
Cash & Equiv.	Curr. Assets	Curr. Liabs.	Sheet Date

Cash & Equivalent, Current Assets and Current Liabilities are given in millions of dollars (000,000 omitted), as 17.5—$17,500,000; 1.75—$1,750,000; 0.18—$175,000, etc. All information in this column is brought up to date upon the release of interim statements. The date of the balance sheet from which the information shown was obtained is also given.

Where current balance sheet items are not of analytical significance, special calculations pertinent to the industry in which the company operates are presented, as "Net Asset Value Per $1,000 Bond" for Investment Trusts, etc.

Yrs.End.

This is the month of the year in which the company's fiscal year closes.

ANNUAL EARNINGS
Times Int. & Fixed Charges Earned

1929-35	1936-55			
Low	Low	1956	1957	1958

The number of times that available earnings cover interest and miscellaneous charges, making up what is generally known as "fixed charges" is shown in these columns for the periods of the column heads. For the years 1929 through 1935 and 1936 through 1955 only the figure representing the worst year of the period is given, as a guide to the adequacy of such coverage under adverse cyclical conditions. Coverage figures for fiscal years ending March 31 or earlier are shown under the column of the preceding calendar year.

Earnings available for income bond interest payments are shown as a percent of par value of the issue outstanding. Fixed charges include not only interest on funded debt, but also interest on bank loans and other forms of floating debt, amortization charges, discounts on securities sold, and any other similar charges. Earnings available for fixed charges are calculated by Standard & Poor's and shown in the Bond Guide after allowance for income taxes, but before extraordinary charges or appropriations to special reserves.

In many instances where important reorganizations have taken place in recent years, the coverage figures are given for previous years on the basis of earnings in those years but after the charges after reorganization. Such cases are correspondingly footnoted.

Interim coverage figures, etc., are shown, when and where available, for the longest accounting interval since the last fiscal year-end.

INTERIM EARNINGS
Times Earned

HOW TO USE STANDARD & POOR'S BOND GUIDE

It is necessary to read carefully the following instructions in order to obtain the correct interpretation of the various abbreviations and data in the Guide

INDEX	Exchange	BONDS Name and Description of Issue Description, Interest Rate, Due and Interest Date	S&P Quality Rating	Eligibility	Tax Status Legality	Original Offering Price & Date	CALL PRICE For S.F.	CALL PRICE Reg.	PRICE RANGE 1936-56 High	PRICE RANGE 1936-56 Low	PRICE RANGE 1957 High	PRICE RANGE 1957 Low	PRICE RANGE 1958 High	PRICE RANGE 1958 Low	PRICE RANGE 1959 High	PRICE RANGE 1959 Low	Cum. 1959 Sales (000)	Last Sale or Bid Ask	Yield to Mty.
The index numbers are a visual guide to the columnar data.	Indicates: ● traded New York Stock Exchange, ◆ American Stock Exchange.	This column gives the name of the issue. In many instances, because of their length, names are abbreviated, as, for example, Pr. – Power, Lt. – Light, Ry. – Railway, etc. Also see standard abbreviations used on Page 7. Every effort has been made, within space limitations, to show the exact corporate title of the issuing company. This column describes the issue, giving the interest rate and due date. Abbreviations are widely used, as, for example, Deb.–Debenture, Cts.–Certificates, Ext.–External, etc. A complete list of abbreviations used in the Earnings and Ratings Bond Guide will be found on Page 7. Interest dates are indicated by the first letter of the alternate six months on which coupons are payable. Unless otherwise noted, such interest dates are always the first day of the month. The month of maturity is indicated by a capital letter.	A complete explanation of Standard & Poor's Bond Quality Ratings is presented on Page 5.	See explanation on Page 4, and Bank Investment Regulations on Page 6. Please refer to detailed explanation on Page 4 as to Tax Status. Please refer to Page 4 for details of Legality features and symbols.	This is the price and date at which the issue was originally offered. When necessary, prices are shown to the nearest eighth.	This space shows the call price for sinking fund, if any, as well as the regular call price. Unless otherwise indicated, bonds are callable at any time. The symbol † means that the call price shown cannot be used without qualification, in that the price shown will decline in the next twelve months. See also page 4 for other symbols and explanation.		High and Low price ranges are for the calendar years indicated. Price ranges are not necessarily exclusive for the exchange, if any, on which the bond is currently traded, but are based on the best available data covering the period of the column head. Ranges may not necessarily cover the entire period of the column head. For example, under 1936-56, for bonds issued subsequent to 1936, the range would be from the time of issuance through the year 1956. The price range of "Over-the-Counter" bonds is based on the best available information as to the high and low "Bid" prices during the period. Because of the lack of reliable data, some of these "Over-the-Counter" ranges may be subject to a fair margin of error. Generally, unlisted bond ranges should best be viewed as reasonable approximations.						Shown only for listed bonds, this figure represents the total of sales (in 000) for the year through the end of the preceding month.	Last sale or quotations are as of the last day of the preceding month. Canadian prices are shown by ▲.	Yields are computed on the last or on the "Ask" price, except where

BOND GUIDE

Published

SEPTEMBER • 1959

rd & Poor's Bond Guide is designed to present in a convenient, manner the most pertinent comparative financial and statistical informa- broad list of corporate bonds. Thus, it is an ideal medium for formu- quick opinion as to the relative investment merits of the numerous ues covered, and for following the trend of their market prices and addition, Standard & Poor's Bond Quality Ratings are presented for ds.

ames of the companies whose issues are covered in the Bond Guide nged alphabetically, thus providing the utmost ease of reference. is especially called to the "era treatment" of price information and ding data of lowest fixed charge coverage for the periods 1929-35 and This is a unique new departure in financial-statistical presentation, esigned expressly to show in an economy of space the most important on from the viewpoint of sound bond analyses.

Numerous pages of the Bond Guide are also devoted to significant supplementary information, including recent changes in S & P Bond Quality Ratings, changes in Bank Status, long term records of bond yields, graphic yield charts, etc. In addition, a special section in each issue of the Bond Guide is devoted to bonds called for redemption and new bond issues registered with the SEC.

United States Government bonds are presented in still another special section of the book.

Although the Bond Guide is not itself an analytical publication, it represents, nevertheless, the results of intensive and extensive analysis by bond specialists utilizing the facilities of the largest and oldest financial advisory and statistical organization in the world. The Bond Quality Ratings in particular are the end result of wide analytical research and special investigation. The factual data presented have been obtained from official company reports and reports to the SEC.

ATTRACTIVE BONDS

The bonds listed on this and the following page are selections from current recommendations in Standard & Poor's bond advisory publications. These publications include STANDARD & POOR'S BOND INVESTMENTS, which include a weekly "Bond Outlook" discussing and analyzing the bond market in relation to the economic and monetary prospect, and the well-known S & P "Bond Selectors"; and STANDARD BOND REPORTS, a bond advisory service consisting of individual loose-leaf analytical reports and forecasts on bonds in which there is representative investor's interest. It is earnestly advised that, before making purchases of any of the bonds in the following lists, subscribers consult first, whenever possible, the detailed recommendation contained on the individual report, and that such purchases only be made if in accordance with existing recommendations as to general bond market policy and portfolio requirements.

Bonds are listed according to maturity, utility issues first, followed by industrial and railroad bonds.

HOW TO USE THE S & P EARNINGS AND RATINGS BOND GUIDE

The following explanations are in addition to those given in the pilot pages shown on the inside front and inside rear covers.

ELIGIBILITY

Under regulations issued by the Comptroller of the Currency, as shown on Page 6, only certain bond issues are eligible for bank investment. The standing under these regulations of the various bond issues covered by the Bond Guide is indicated under the "Eligibility" column, by the following symbols:

X—This symbol designates bonds rated the equivalent of Standard & Poor's A1+, A1, A or B1+ ratings by a majority of the three recognized rating agencies which have assigned ratings to the issue.

sX—These are "special privilege" bonds. They include "convertible" and "with warrants" issues. In the opinion of Standard & Poor's they may be considered "eligible" provided the speculative value of their "special privilege" is not reflected in their current market price.

Y—These are bonds which do not conform with the above rating classification. It is the S & P opinion that bonds carrying the (Y) symbol are those which may be valued at the average market price for 18 months just preceding examination.

Z—This symbol indicates bonds with a default status.

Q—These are foreign bonds whose bank eligibility is not determined by the ratings of the various agencies.

TAX STATUS

The numerals in this column of the Bond Guide indicate the Federal Income Taxes paid at the source: 1—1% paid by the company, 2—2% paid by the company, O—no tax paid by the company, "R"—indicates tax paid by the holder of the bond (up to 2%) is refunded by the company.

Subscribers requiring comprehensive information on the tax status of bonds are referred to Standard & Poor's "Status of Bonds" and monthly supplements, which cover the exact tax status under both the Federal and State taxes and serves as a coupon directory.

LEGALITY

Symbols in this column of the Bond Guide indicate representative states in which the various issues covered qualify as legal investments. For all states bonds legal for savings banks also are believed suitable for trust funds. In New Jersey all bonds legal for savings banks are legal for trust funds, but numerous other issues also meet the requirements of the more liberal trust fund law, and are so additionally indicated.

CALL PRICES

As indicated by the column heads, the Earnings and Ratings Bond Guide presents both the regular call price of the bonds covered and the call price for sinking fund, if any.

Unless otherwise indicated, the issues are callable at any time. When a bond is callable only on an interest date, it is so shown by the use of the symbol (*). The symbol (†) means that the call price as given will decline sometime within the next twelve months in accordance with the indenture provisions of the bond. Thus, the call prices so shown must not be used without qualifications. The symbol (‡) means that not only can the bond be called only on an interest date, but also that the call price will decline within the next twelve months.

Non-callable bonds are so indicated by the abbreviation NC. Special abbreviations are also necessary when a bond is not now callable but will be callable at a later date, in which case, for example, the use of 2'63 would mean non-callable now but callable at 102 in 1963. The use, as another example of special call features, of ½-3 would indicate the range of call prices on serial maturity bonds, the first figure (100½) being the present call price for the first maturity and the last figure (103) being the call price for the last maturity.

STANDARD & POOR'S BOND RATINGS

In the Standard & Poor's bond quality ratings system, interest-paying bonds are graded into eight classifications ranging from A1+ for the highest quality designation through A1, A, B1+, B1, B, C1+ to C1 for the lowest. Bonds on which no interest is being paid, either because of default or because of "income" characteristics, are given C, D1 and D ratings. United States Government bonds are not rated, but are considered as a yardstick against which to measure all other issues.

BANK QUALITY BONDS

Under present commercial bank regulations, bonds assigned quality ratings equivalent to A1+, A1, A and B1+ generally are regarded as eligible for bank investment.

A1+ Bonds rated A1+ are the highest grade corporate obligations. They possess the ultimate degree of protection as to principal and interest. Marketwise, they may be expected to move with interest rates and hence are desirable investment media for institutions and individuals seeking maximum safety.

A1 Bonds rated A1 also qualify as high grade obligations, and in the majority of instances differ from A1+ issues only moderately in the various elements of safety. A1-rated bonds, too, move with interest rates and hence are appropriate media where safety is a prerequisite.

A Bonds rated A are regarded as upper medium grade. They have considerable investment strength but are not wholly free from possible adverse effects of changes in economic conditions. However, interest is regarded as secure and, by and large, principle appears relatively safe. They predominantly reflect money rates in their market behavior, and, to some extent so, business conditions.

B1+ The B1+, or medium grade, category is borderline between definitely sound obligations and those wherein the speculative element begins to predominate. These bonds have adequate asset protection and normally are covered by satisfactory earnings. Their susceptibility to changing conditions, particularly to lengthy depressions, necessitates constant watching. Marketwise, the bonds are as responsive to business conditions as they are to interest rates. The group is the lowest which qualifies for commercial bank investment.

SUB-STANDARD BONDS

As we move down the quality rating scale, beginning with B1, investment characteristics weaken and the speculative elements become progressively stronger. Bonds in this group do not qualify for investment by commercial banks.

B1 Bonds given a B1 rating are regarded as lower medium grade. They have some investment characteristics, though not enough to warrant an investment rating. In the case of utilities, interest is earned consistently but by narrow margins. In the case of other type of obligors, charges are earned on average by a fair margin, but in poor periods deficit operations are likely. These bonds fluctuate widely with business conditions.

B Bonds rated as low as B are speculative. Payment of principal and interest cannot be assured, though frequently bonds in this group continue paying interest even though it is earned only on a cash basis. The issues move primarily with the equity market.

C1+-C1 Bonds rated C1+ and C1 are outright speculations, with the lower rating denoting the more speculative. Interest is paid, although in the case of C1 ratings the bonds may be on an income basis and the payment may be small.

C This rating is reserved for income bonds on which no interest is being paid, and for the best defaulted issues.

D1-D All bonds rated D1 and D are in default, with the D symbol assigned to issues which appear to have little recoverable value.

CANADIAN BONDS

Canadian corporate bonds are rated on the same basis as American corporate issues. The ratings measure the intrinsic value of the bonds, but they do not take into account exchange and other uncertainties.

FOREIGN BONDS

Foreign bonds carry the same rating symbols as domestic bonds, but in all cases they are preceded by a star ★ to denote a conditional rating. This is applied because the obligor is a sovereign body and the bonds are sometimes affected by other than economic factors.

BANK INVESTMENT SECURITIES REGULATION

Effective Aug. 16, 1957, the Comptroller of the Currency issued following regulation applying to the purchase for its own account of investment securities by a national bank or a State member bank of the Federal Reserve System.

Definition of the Term "Investment Securities"

(a) An obligation of indebtedness which may be purchased for its own account by a national bank or State member bank of the Federal Reserve System in order to constitute an "investment security" within the meaning of paragraph Seventh of section 5136 of the Revised Statutes, must be a marketable obligation, i.e., it must be salable under ordinary circumstances with reasonable promptness at a fair value; and except as provided in (b) and (c) below, there must be present one or both of the following characteristics:

(1) A public distribution of the securities must have been provided for or made in a manner to protect or insure the marketability of the issue; or,

(2) Other existing securities of the obligor must have such a public distribution as to protect or insure the marketability of the issue under consideration.

(b) In the case of investment securities for which a public distribution as set forth in (1) or (2) above cannot be so provided, or so made, and which are issued by established commercial or industrial businesses or enterprises, that can demonstrate the ability to service such securities, the debt evidenced thereby must mature not later than ten years after the date of issuance of the security and must be of such sound value or so secured as reasonably to assure its payment; and such securities must, by their terms, provide for the amortization of the debt evidenced thereby so that at least 75% of the principal will be extinguished by the maturity date by substantial periodic payments: Provided, that no amortization need be required for the period of the first year after the date of issuance of such securities.

(c) Special revenue obligations of States or local governments or of duly constituted public Authorities thereof which possess a high degree of credit soundness, so as to assure sale under ordinary circumstances with reasonable promptness at a fair value, but which do not meet the distribution standards of (a) (1) or (a) (2) above, may be considered to constitute "investment securities."

(d) Where the security is issued under a trust agreement, the agreement must provide for a trustee independent of the obligor, and such trustee must be a bank or trust company.

(e) All purchases of investment securities by national and State member banks for their own account must be securities "in the form of bonds, notes, and/or debentures, commonly known as investment securities"; and every transaction which is in fact such a purchase must, regardless of its form, comply with this regulation.

Limitations and Restrictions on Purchase of Investment Securities For Bank's Own Account

(a) Although the bank is permitted to purchase "investment securities" its own account for purposes of investment under the provisions of R. S. 5 and this regulation, the bank is not permitted otherwise to participate as principal in the marketing of securities.

(b) The statutory limitation on the amount of the "investment securiti of any one obligor or maker which may be held by the bank is to be determin on the basis of the par or face value of the securities, and not on th market value.

(c) The purchase of "investment securities" in which the investment char teristics are distinctly or predominantly speculative, or the purchase of secu ties which are in default, whether as to principal or interest, is prohibited.

(d) Purchase of an investment security at a price exceeding par or face va is prohibited, unless the bank shall:

(1) Provide for the regular amortization of the premium paid so that premium shall be entirely extinguished at or before the maturity of security, and the security (including premium) shall at no intervening d be carried at an amount in excess of that at which the obligor may lega redeem such security, unless the amortization which would be necessary meet the latter requirement would not be allowable as a deduction fr gross income under applicable Federal Internal Revenue laws and regu tions issued thereunder, in which case the rate of amortization shall sufficient to extinguish the premium by maturity; or

(2) Set up a reserve account to amortize the premium, said account to credited periodically with an amount not less than the amount required amortization under (1) above.

(e) Purchase of securities convertible into stock at the option of the iss is prohibited

(f) Purchase of securities convertible into stock at the option of the ho or with stock purchase warrants attached is prohibited if the price paid such security is in excess of the investment value of the security itself considered independently of the stock purchase warrants or conversion feat If it is apparent that the price paid for an otherwise eligible security rep the investment value of the security and does not include any specula value based upon the presence of a stock purchase warrant or conversion opt the purchase of such security is not prohibited. If the price paid for a c vertible security provides a yield reasonably similar to that of non-convert securities of similar quality and maturity, a speculative value will not deemed to exist.

(g) All investment securities shall be supported by adequate information the files of the bank as to their investment quality.
